

Printing Instructions

Historical seasons can be purchased as PDF files from SeasonTicketBaseball.com and printed at home. These seasons include Player Cards and Stadium Cards for every team:

❑ Player Cards

Each download includes a “Teams” folder with Player Cards, grouped by team and formatted to include 6 players per sheet (8.5” x 11”). All players from each season are included.

For printing, we recommend the following pre-perforated cardstock:

<https://amzn.to/3axsyio>

(or search on Amazon for “perforated cards 6 per page”)

RTF Files

You can print the RTF files using Microsoft Word. (Word displays a warning that the margins are too small, but if you choose “Print Anyway”, you should get good results).

PDF Files

Cards are also provided as PDF files. Adobe Acrobat may automatically add a margin to all four sides, making the printed cards somewhat asymmetrical. To get around this problem:

1. Select “Properties” from the File Menu (or type Ctrl-D).
2. Click the Advanced tab.
3. Change Page Scaling from “Default” to “None”.

❑ Stadium Cards

Each team includes one single-sided Stadium Card. As with the Quick Start Card and Strategy Card, these are intended to be printed on 8.5” x 11” cardstock:

<https://amzn.to/38YMABY>

Pre-Printed Teams

Individual printed teams (on the cardstock mentioned above) can also be purchased at SeasonTicketBaseball.com. Each purchase also includes that team’s Stadium Card.

These can be shipped within the United States and Canada.

Free Downloads

The following are available for free at SeasonTicketBaseball.com/downloads.html:

❑ Stadium Cards

Updated Stadium Cards for every season are always available as free downloads.

Stadium Cards are released under the **Creative Commons Attribution-NonCommercial 4.0 International License**. This means you are free to modify and redistribute them.

❑ Scoresheet

A 2-page scoresheet, customized for use with *Season Ticket Baseball*. Page 1 records the batting results for the Away Team and Page 2 records results for the Home Team. This may be printed double-sided if desired.

❑ Pitcher Batting Cards

Pitcher Batting Cards are also single-sided. The document contains 6 identical cards (each pitcher’s ratings determine which columns to use). If you play without the designated hitter, you should insert one Pitcher Batting card into each lineup. As with Player Cards, you can print these on perforated cardstock with 6 cards per page.

You can also buy pre-printed Pitcher Batting cards at SeasonTicketBaseball.com.

Additional Items

❑ Dice

One six-sided die and two ten-sided dice.

The game assumes that the six-sided die is red and the ten-sided dice are blue and white (letting you read the dice in the order “red-white-blue” to create a 3-digit number). You can use any color dice, as long as you have a way to differentiate the ten-sided dice.

You can buy dice at SeasonTicketBaseball.com.

❑ Storage Bags

I have found 5” x 5” clear plastic bags to be useful for storing individual teams:
